Dana Spears
Unit 8 Assignment
CIS 81 – Javascript and Dynamic HTML
Summer 2016

Chapter 6:

Chapter 6 Exercise:

3. (a) See Temperature.html page attached. Nothing else needs to change except the lines for the button HTML. However, you may wish to include additional CSS for the button image and/or content.

(b) The Button tags offer richer rendering possibilities than the standard input tags and additionally allow content. This was the purpose of creating the Button tag. Now programmers did not have to be designers and use Photoshop to create the tags and through CSS can add content to the Button element.
